

DISPOSITIVO URINARIO FEMENINO

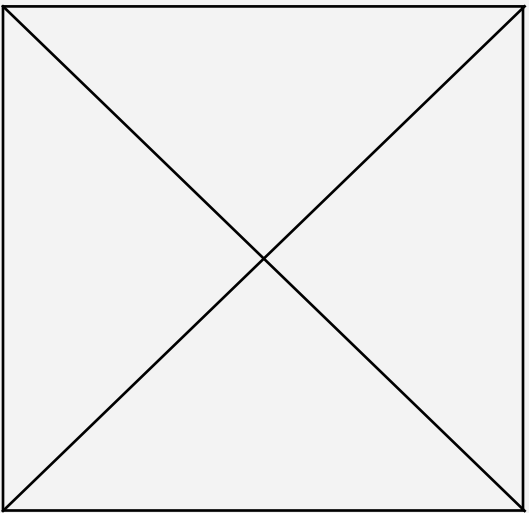

LOREM IPSUM NDJEWNE IS DWID

The Pee Pocket® was developed by a team of doctors who were fed up with dirty and unsanitary public bathrooms for their families. These surgeons developed a single-use, disposable, biodegradable women's standing urination device so that everyone can finally take a stand®, avoid un-sanitary conditions and the potential for skin infections.

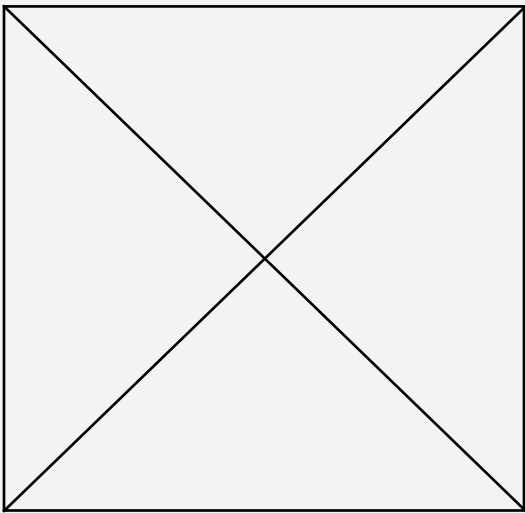

The demand for Pocket® has been so great by patients that a larger 48-pack carton was developed for hospitals, clinics, acute and long-term care facilities. Elderly women, post-surgical patients, (hip, knee, etc.), pregnant women and men who have trouble squatting or bending down to pee have regained their independence to relieve themselves.

MI VIAJE SOÑADO PODRÍA IRSE POR EL CAÑO

20. abril, 2018 | Categories: Trotamundos

VIAJAR A UN DESTINO EXÓTICO.., ¿A QUIÉN PODRÍA NO APASIONARLE LA IDEA?

Cuando pensamos en descubrir nuevas culturas, imaginamos comidas diversas y coloridas, paisajes vibrantes e infinitos, gente extravagante pero cordial, y un sin-número de expectativas.

Sin embargo, ¿alguna vez te has preguntado acerca de los baños de tu destino soñado?. Este punto es sumamente importante pero muchas veces olvidado, lo que provoca un shock al momento de descubrir lo que será nuestro nuevo lugar de evacuación.

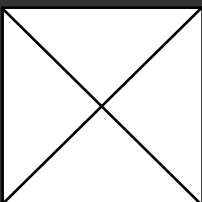

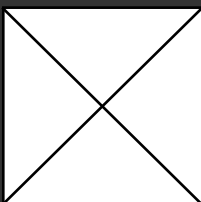

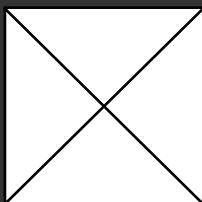

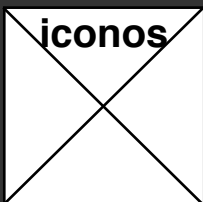

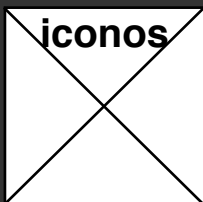

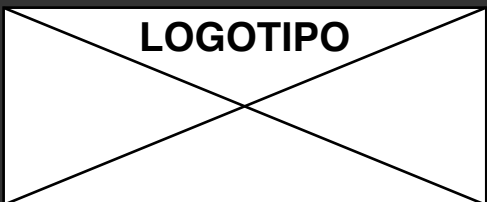

Aunque para los hombres esto no suele ser tan grave, puesto que se lo pueden tomar “con distancia” (al menos en cuanto a orinar), para las mujeres la única posibilidad es usar toda nuestra coordinación y equilibrio en distintas maniobras que han sido traspasadas de generación en generación.
